Subject: CERTIFICATION OF APPROVAL

As a result of our Quality Audit review of your facility, March 18, 2014, and ongoing evaluations of your sample assemblies, we are pleased to confirm continued approval of your organization as an authorized fabricator of Stratoflex aircraft hose assemblies.

You are authorized to fabricate hose assemblies (ref. page 2, Hose Product Charter) from Stratoflex hose and fitting components and to certify that assemblies you fabricate, as branded with the Stratoflex manufactured trade mark, are the same as previously qualified by Stratoflex in all respects. You are to identify each assembly with the name Parker Stratoflex and/or the staggered "S" trademark and the Stratoflex part number designation, including the code "CT". All hose and fitting components will be provided to you from our USA stock and are approved under the US Government Qualified Product List and meet Aerospace Quality Supplier Product standards. You are not authorized to mark TSO designation or to certify airworthiness for direct ship authorization to USA registered aircraft.

Your Hose Shop Quality Program Manual, dated June 18, 2012, is approved as assurance of compliance with the Stratoflex Distributor Quality Program Manual issued Feb. 4, 2014.

Your equipment, procedures, methods of assembly workmanship, records and tests were found to be in good practice and in compliance with all the appropriate requirements. Adequate records are available and are maintained for review at anytime by customers, the FAA, other U.S. Governments activities or Stratoflex as necessary. You must advise us prior to any changes in your operation regarding Stratoflex processing or personnel. You are to follow all Stratoflex procedures to fabricate, identify, inspect and test aerospace hose assemblies and you are fully responsible for the warranty and service of these assemblies. Stratoflex will provide technical service and perform periodic control tests as scheduled for surveillance and assurance that your processing fully conforms to all Stratoflex requirements. For assurance of continued compliance to all specifications, further audits will be conducted on a timely basis.

Sincerely,

PARKER HANNIFIN CORPORATION

Stratoflex Products Division
